

# Virtual Classroom

Connect crew,  
expert educators,  
and shore-based  
teams

Powered by

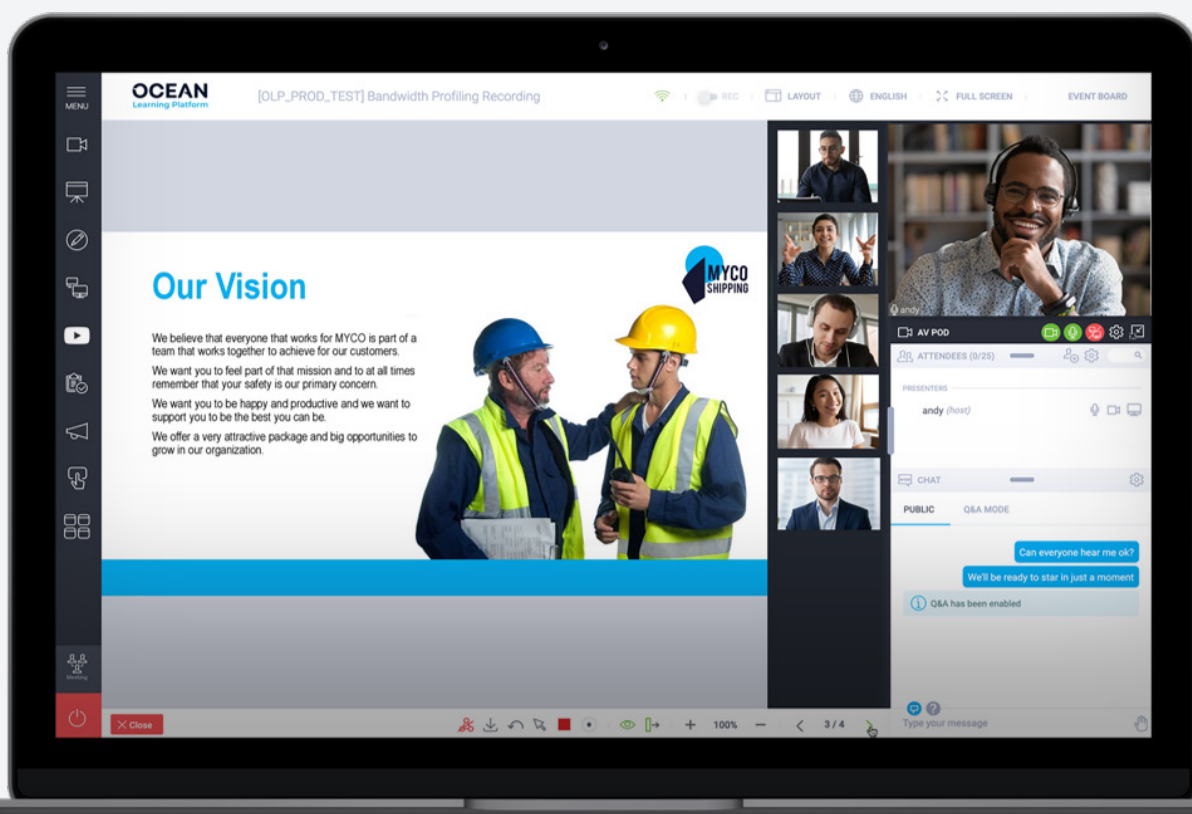

Our Virtual Classroom is an online browser-based tool for training, collaborating and communicating with your people, wherever they are in the world.

A fully integrated and seamless connection between the learning that happens ashore and aboard - Virtual Classroom bridges the gap between shore-based activities and the experiences, knowledge and education gained at sea.

As part of the Ocean Learning Platform, Virtual Classroom provides an unmatched level of connectivity and consistency in learner records. Enrolment, attendance and assessments are all housed on the same platform, leaving no room for errors, and ensuring that records are always available whenever they are needed – in the office or on an inspection.

***Virtual Classroom eliminates travel and hotel costs and leaves crew with more time to spend with their families, all while retaining the in-person interaction of face-to-face learning.***

## A classroom experience without borders

Virtual Classroom makes it possible to enhance and combine in-person education, e-learning and hands-on sessions with remote classroom sessions.

Easily design and deliver mixed format learning programmes:

- + Assign pre-event tasks or e-learning
- + Integrate custom learning modules
- + Run in-event polls/quizzes
- + Use breakout rooms for teamwork
- + Work on the collaborative whiteboard
- + Gather feedback with in-event or post-event surveys
- + Assign post-event reading or further learning
- + Remote teaching in a digital classroom environment to bring learners together, wherever they are

## A world of possibilities

Virtual Classroom is a space for connection, collaboration and communication - enabling you to share information, deliver training and engage with your people.

As part of the Ocean Learning Platform, Virtual Classroom offers an endless number of other applications, including:

- + Preparatory co-ordination between ship and shore, ahead of audits and inspections
- + Pre-joining familiarisation calls and post-relief debriefing meetings
- + Safety meetings and coordination between ship, shore and third parties
- + Remote assessments and interviews of personnel
- + Crew seminars and events

### Key benefits

Reduced travel and associated costs

Less time away from home

Faster familiarisation

Robust against travel disruption

Data synchronised and accessible

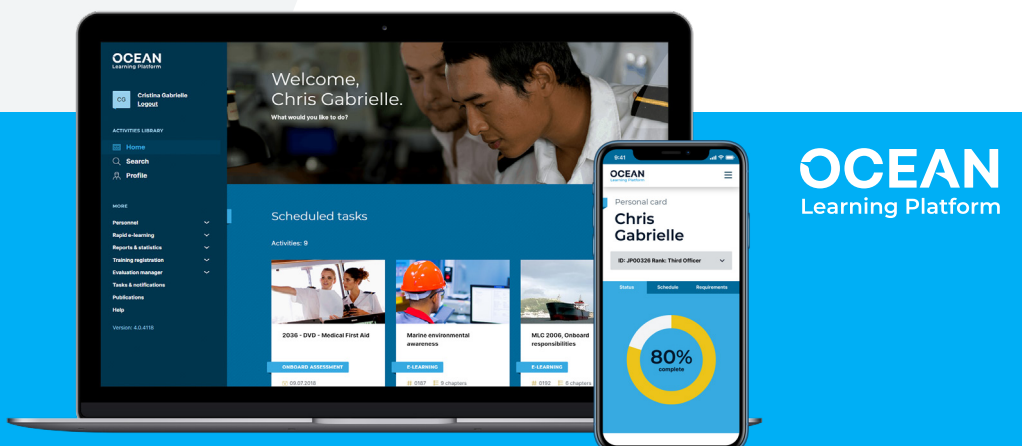

*Familiarisation and training can be conducted remotely, which means less time is spent travelling to training and briefing centres, leaving more time to spend learning and working.*
