

# LNG and LPG Tanker Competence Standard

Consistently evaluate  
the competence of  
your LNG and LPG  
gas carrier crews

The Ocean Technologies Group LNG and LPG Tanker Competence Standard is a comprehensive framework for ensuring the consistent assessment of the competence of officers operating LNG and LPG Tankers.

This standard has a statement of compliance from DNV, verifying that it fulfils and complies with SIGTTO requirements.

The standard covers requirements specific to LNG, LNG Steam and LPG, with requirements mapped to ranks.

Powered by

*This standard ensures consistent evaluations across diverse fleets, regardless of who is carrying them out.*

## Benefits of the LNG and LPG Tanker Competence Standard

This standard ensures consistent evaluations across diverse fleets, regardless of who is carrying them out.

- + The standard covers LNG, LNG steam, and LPG vessels, providing assessors and crew with clear guidelines and criteria for evaluation.
- + With competencies mapped to ranks, the standard makes it easier to conduct evaluations of competence consistently and fairly, regardless of who is carrying them out.
- + The LNG and LPG Tanker Competence Standard can be implemented alongside other standards in OLP, including the e-BCAV behavioural competency standard, providing you with comprehensive coverage of technical and behavioural competencies in a single system.
