e-ICMG

Ensure your tanker officers have the technical competencies needed to perform their duties

INTERTANKO produced ICMG as competency guidance covering recommended core tanker technical skills beyond STCW certificates of competency for tanker officers.
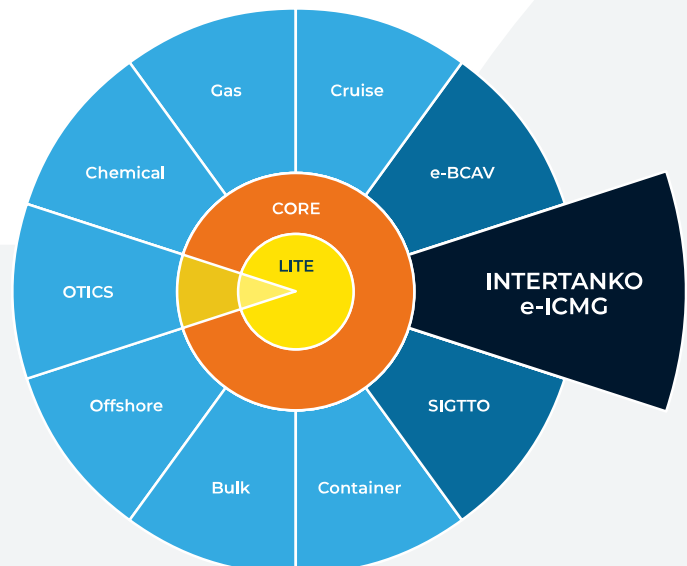

Implementing this guidance as part of your own competency management system (CMS) provides you with additional focus on safety at sea, and a clearer picture of the competence levels of the crew manning your tanker vessels.

Ocean Technologies Group have worked with INTERTANKO to develop a digital adaptation of ICMG, for use within your competency management system, as e-ICMG.

Ocean Technologies Group offer e-ICMG through the Ocean Learning Platform.

Benefits of e-ICMG

Shaped by a steering group of some of the most prestigious tanker operators and ship managers, e-ICMG benefits from the experience of experts operating the widest range of chemical, crude and product tanker vessels.

⊕ e-ICMG is highly compatible with soft-skill behavioural competency assessment and can be implemented alongside OCIMF-INTERTANKO 'Behavioural Competency Assessment and Verification for Vessel Operators' guidelines (BCAV).

⊕ Comprising of 72 technical competences, e-ICMG sets a manageable entry level into competency management, while being a valid guidance created by an industry body.

⊕ Implementing e-ICMG enables you and your senior officers to be more aware of seafarers' proficiencies in key areas, identify any gaps, and to put measures in place to upskill them to the required level.

Comprised of 72 technical competencies:

- ● Navigation
- ● Mooring operations
- ● Cargo operations
- ● Engine

Summary

e-ICMG:

⊕ Produced and verified by INTERTANKO and its members

⊕ Comprised of 72 technical competencies: 5 for navigation, 9 for mooring operations, 45 for cargo operations and 13 for engine

⊕ Covers chemical, crude and product tanker operations

⊕ Compatible with soft-skill assessment (e.g. e-BCAV)

⊕ Available through the Ocean Technologies Group CMS

⊕ Fully integrated into the Ocean Learning Platform
